Re: Proposed Chain Link Fence  
Sauget and Cahokia, Illinois

Dear Mr. Shaw:

Please find attached a copy of Explorer Pipeline Company's August 9, 1982 agreement affixed with my signature. Pursuant to our September 1, 1982, telephone conversation this action will allow the United States Environmental Protection Agency (USEPA) to install a chain link fence across Explorer's 14 inch pipeline which parallels the west side of Dead Creek.

The only change in the agreement is that Condition #2 has been deleted. Mr. Howard McCloud of Explorer and Mr. Thomas Daggett of the USEPA agreed to delete the Condition #2 during their August 24, 1982 telephone conversation. USEPA and our contractor will adhere to the other eight conditions as written by Explorer.

On August 31, 1982, I met with Mr. W.C. Rush of Explorer at the Dead Creek site. Mr. Rush staked the pipeline and determined that the majority of the pipeline will lay outside the area which USEPA intends to fence off. However, the fence will cross the pipeline at four points and I have sketched these locations on the map you provided.

Our contractor will contact Mr. Rush prior to drilling any post holes on the west side of Dead Creek. This work is scheduled to begin the week of September 6, 1982.

Please do not hesitate to call me at (312) 886-3008 if you have any additional questions concerning this project.

Sincerely yours,

/s/  
Michael C. O'Toole  
On-Scene-Coordinator
